Rentar Is Aggregate Winner for Stone Industry

WEST PALM BEACH, Fla.--(BUSINESS WIRE)--Aug. 16, 2004--Rentar Environmental Solutions, Inc., a US EPA Energy Star Partner, received another ringing endorsement this month in the aggregate industry publication Rock Products. The Rogers Group, the seventh largest crushed stone producer in the nation was featured in the publication and its very positive experience with the Rentar Fuel Catalyst http://rockproducts.com/mag/rock_fuel_catalyst_cuts/.

Rogers Group Equipment Manager Cameron Druyor is quoted throughout the article on the benefits of the Rentar. On fuel consumption, he says the average savings are 7.5%. "I had an L330D Volvo wheel loader, which is already a pretty fuel-efficient machine, and I saw a 6% improvement," he says. The greatest reduction was 32% on a Caterpillar 980C wheel loader. "It's pretty easy to do the math. There's a 3309 Terex haul truck that went from 12.8 gallons per hour down to 10. There's 2.8 gallons (per hour) that you are not buying," Druyor added.

Druyor also states that he sees an improvement in the horsepower of the engines unlike other exhaust emission treatment technologies. "First and foremost, we are interested in the health of our employees. If we get a dollar savings, that's great. We're after trying to reduce our emissions as much as possible." He says there was a noticeable difference on the emissions when the catalyst was installed on a Cat D399 generator.

The Rogers Group had initially tried the Rentar on 18 pieces of equipment including haul trucks, wheel loaders and generators. Due to the success of those initial 18 Rentars the company is in the process of outfitting 50 additional engines.

Rentar's patented pre-combustion Catalyst allows its diesel and heating oil burning clients to achieve energy efficiency through fuel savings while simultaneously reducing CO, CO₂, NO_x and particulate matter emissions. The Rentar Fuel Catalyst has a ten year limited warranty, requires no ongoing maintenance and has no moving parts or additives.

Joel Ratner, President of Rentar says, "We are delighted to have a forward-thinking company such as The Rogers Group as a client. This company sought to do the right thing by their employees, and in the end has improved its bottom line." Mr. Ratner continued, "The Rentar has this effect for all our clients, we just have not in the past received this type of nation-wide recognition, but that too should change."
