

## Press Release

### Rentar Proudly Announces ENERGY STAR Partnership

Monday April 19, 9:33 am ET

WEST PALM BEACH, Fla.--(BUSINESS WIRE)--April 19, 2004--Rentar Environmental Solutions, Inc. proudly announces its selection as an official partner in the ENERGY STAR® program, a federal certification alliance, which helps business and people save money and protect the environment through increased energy efficiency. Products with the ENERGY STAR® label use less energy, reduce costs and protect the environment.

Rentar's pre-combustion patented Rentar Fuel Catalyst allows its diesel and heating oil burning clients to achieve energy efficiency while simultaneously appreciably reducing CO, CO<sub>2</sub>, NO<sub>x</sub> and particulate matter emissions. The Rentar is a cost effective pre-combustion emission device, which can pay for itself in fuel savings alone in less than a year and continue returning results for the life of the unit.

Joel Ratner, President of Rentar says, "This is a very important recognition of the Rentar Fuel Catalyst and we look forward to assisting in the education of people and businesses regarding the energy, economic and environmental benefits of ENERGY STAR® products."

ENERGY STAR® is a certification program backed by the U.S. Department of Energy and the U.S. Environmental Protection Agency. Through its private and public sector partners ENERGY STAR® saved enough energy last year alone to power 20 million homes and avoid greenhouse gas emissions equivalent to those from 18 million cars; all while saving \$9 billion. Over the past decade, ENERGY STAR® has been a driving force behind more widespread use of technological innovations.

"We look forward to working with diesel and heating oil using industries to offer our technology for an economical / environmental solution that is consistent with the ENERGY STAR® program." Mr. Ratner added.
